3.1. Before Creating a Research Output

First, you always need to **check if the content already exists in Pure**:

1. Remove the my content filter by on the “x”

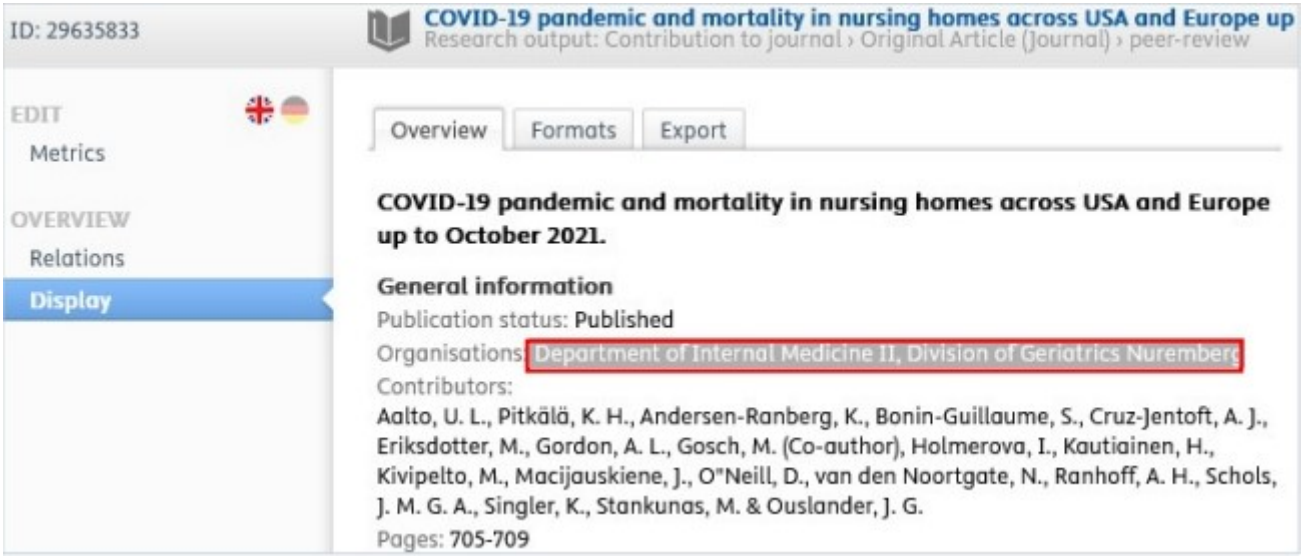

2. Now you have access to every publication not just those related to your teaching hospital:

3. Search for the publication by title, PubMed ID, or other identifiers.

- If the publication you wish to import into PURE **appears in the list**, click on it and verify whether your teaching hospital is associated with the publication. In this example the publication is only associated with the Department of Internal Medicinie II, Division of Geriatrics Nuremberg. If your teaching hospital is **not related** to the content, but it should be, please contact Research Management at pure@pmu.ac.at.

- If the publication you wish to import **does not appear in the list**, you can import the publication without creating duplicates. For the details please refer to chapter Ways Importing and Creating Research Outputs.
