2.5. Create From Template

Please use this method only **if the two other methods** mentioned above are **not possible**. For instance, if you wish to add a book(chapter), or import a publication that is published in a scientific journal, but the journal is not listed in Web of Science or PubMed.

To create a new research output from template:

1. Click on the Add content button:

Or click on the *triangle* next to Personal in the header, select *Research outputs*, and then click on the button:

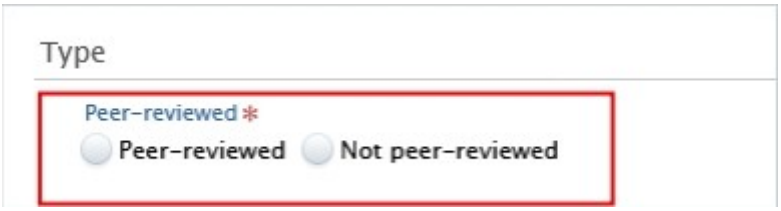

2. Select *Create from template*.

3. Scroll down until you locate the precise type of the item you want to add. In most cases it is a *Contribution to a journal/Original article*.

4. In the Research output editor window, you need to manage these fields:

    1. **Peer-reviewed**:
    Whether the publication underwent a **peer-reviewed process** or not (peer-reviewed or not peer-reviewed):

Click on *Change template* if you realise that the **subtype** of the Research output is **incorrect**. For example, if you have selected *Original article* but need to add a *Review article*, you can easily switch between template types without losing any of the data you have already filled

in:

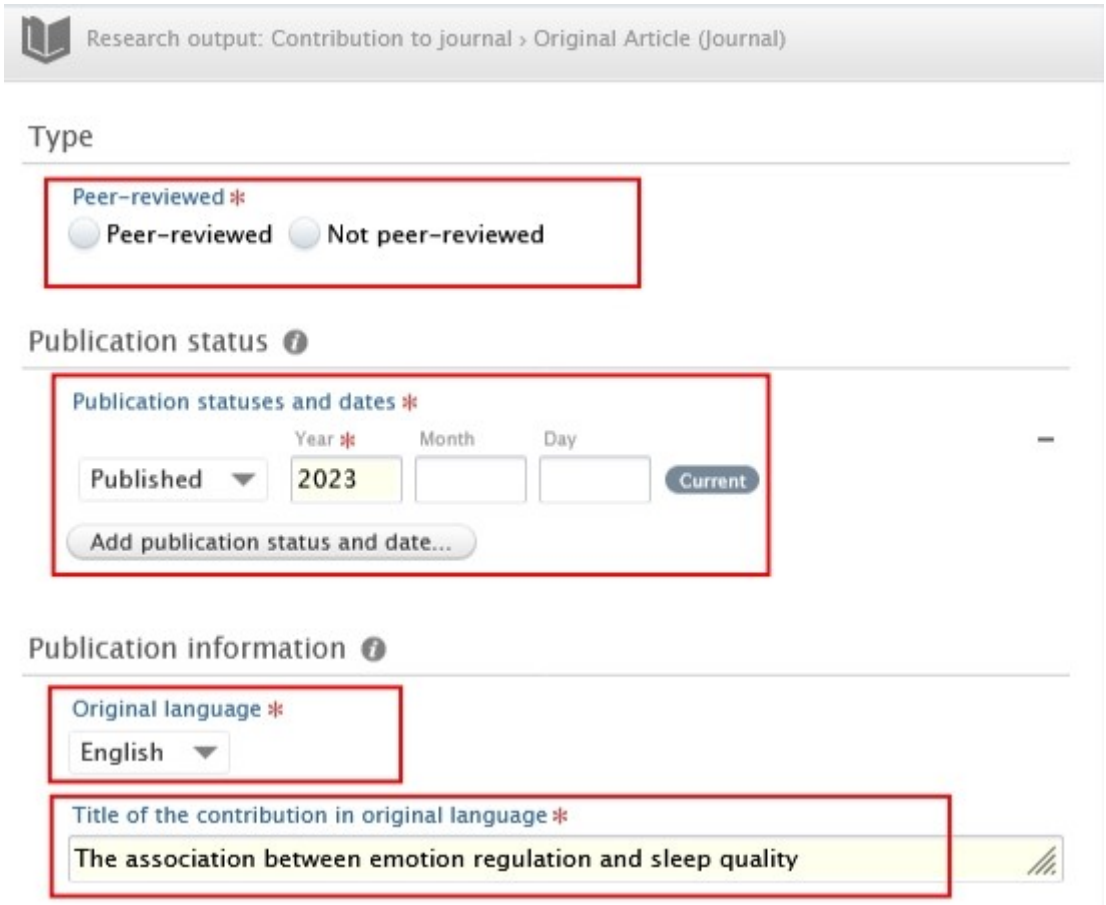

2. **Publication statuses and dates:**
   Fill in the information of the publication status and dates.

3. **Original language**:
   Choose the original language of the publication.

4. **Title of the contribution in original language**:

   Fill in the title of the contribution in the original language.

5. **Contributors and affiliations**:

You need to add **every contributor with their affiliations** to these fields. The **order** of the **authors** in Pure should **match** the order in the publication. You can change the order by clicking on the arrows. You can add additional contributors by clicking on the *Add person* button, and you can add internal and external organisations by clicking on the *Add Organization Unit* button. Don’t forget to add your teaching hospital to the organisations units.

6. **Managing organisational unit**:
   Select **your internal organisational unit** by clicking on the Managing organisational unit button. External organisations cannot be added in this field. (In some cases, RM may assign a different internal organisation during the validation process).

7. **Journal**:
   Click on *Add journal* then search for the name or the ISSN number of the journal.
   If you do not find the journal in the list, click on *Create new* and fill in the required information.

8. **Electronic versions of this work:**
   You can register a DOI or other links to your publication, but please **refrain from uploading the original publication** into Pure.

9. **Research topic:**
   Assign on or more research topics for the following publication from publication year **2025 onwards: Original article, review article, case report, letter to the editor, editorial, short comment/notes, book, book chapter**. For **other categories**, such as abstracts, corrections or publications in which **only PMU teaching hospitals** are involved as internal organizations, **no** topic **assignment** is required.

5. Set the workflow status *For validation* and then click on *Save*.

In the next step, the imported research output undergoes **validation** by the RM.

> Are you interested in an **automated publication search** from online sources? See section Automated search (without immediate effect).
