

3.1. Introduction

Award Management module utilizes the following content types:

- Applications
- Awards
- Projects

At PMU, we distinguish between two types of Projects:

- competitive Projects
- non-competitive Projects

For a **competitive Project**, such as FWF Project, you need to **create** three datatypes: an **Application, an Award, and a Project**. This is necessary so that you can register **the start and end dates of the Project** in the **Project** content type. To enter the **applied and awarded amounts**, you need to create an **Application and an Award**. For the exact steps in PURE, please refer to the section on [Competitive Projects](#).

For a **non-competitive Project**, such as a clinical project, you need to **create** two datatypes: an **Award, and a Project**. This is necessary so that you can register the **start and end dates of the Project** in the **Project** content type. To enter the **awarded amount**, you need to create an **Award**. For the exact steps in PURE, please refer to the section on [Non-competitive Projects](#).
