

9.4. Visibility

Visibility controls the **internal and the external access** of the records in Pure. You can control the visibility of your records by setting the visibility state from the dropdown list.

The following 4 visibility types are available in Pure:

Visibility state	Description
Public	No restriction on visibility. All users of Pure can see the content and it is displayed on Pure Portal.
Campus	When viewed on the Pure Portal, visibility is restricted to viewers with a specific IP range set to reflect being on campus at your institution. All users of Pure at your institution can see this content from within Pure.
Backend	Restricted to Pure users. This content is only visible within Pure.
Confidential	Highly-restricted visibility. Only visible from within Pure to general administrators and (those acting on behalf of) users that have been explicitly added to the record or have a role approving/validating the record.
